Tomorrow's resilience depends on today's cryptographic decisions

Achieve Cyber Resilience,
Achieve Greater Heights

- **Enterprise Threat Visibility & Proactive Risk Management**
- **24x7 Security Operations & Rapid Incident Response**
- **Application & Code Security Assurance**
- **Quantum-Ready Security & Cryptographic Resilience**
- **Compliance-Driven Zero Trust & Data Protection**

About Company

mPHATEK Systems is a global cybersecurity and IT consulting company helping enterprises secure critical systems, manage cryptographic risk, and prepare for emerging threats. With deep expertise in security operations, architecture, and post-quantum readiness, we support organizations across their journey from discovery to long-term resilience.

Safeguard your digital assets with our comprehensive cybersecurity solutions

Threat Management

- Continuous Monitoring
- Advanced Analytics
- Response Actions
- Framework Reports
- Threat Correlation Digital Forensics And Incident Response
- Real-time Visibility And Insights

Cloud Security Services

- Identity and Access Control
- Logging, Monitoring, and Incident Response
- Data Loss Prevention (DLP) and DR Automation
- Zero Trust Architecture
- Cloud Network Security

Cybersecurity Consulting

- On-Site Consulting
- Perimeter Management of the Client's Network
- Security Architecture Design
- Managed Security Monitoring
- Vulnerability Assessments

Data security and privacy

- Data Protection Solutions
- Compliance and Regulatory Services
- Identity and Access Management (IAM)
- Security Monitoring and Incident Response
- Data Privacy Services

Security Operation Centre

- 24/7 Threat Defense
- Leverage Capabilities such as SIEM, SOAR, and EDR to Improve Productivity and Efficiency
- Simplified Security Operations
- Comprehensive Protection

Chronos
Quantum Ready Security

CBOM & QBOM Solution for Quantum Readiness

- Scan the environment and identify where cryptography has been used.
- Simplified reporting with detailed information on encryption usage.
- Option to scan in bulk or individually, based on needs.
- PQC implementation on servers.
- Secure internet traffic with PQC.
- Quantum-resistant algorithms for encryption
- TLS/SSL integration with PQC.
- Backward compatibility during PQC transition.

Enterprise-Grade Security Tool Ecosystem

Security Tools

splunk> · AUTOPSY · SentinelOne · ArcSight · Microsoft Defender · Nikto · paloalto NETWORKS · Nessus · WIRESHARK · ATLASSIAN Jira · metasploit · ANOMALI · IBM QRadar · RAPID7 · CROWDSTRIKE · IBM Resilient · LogRhythm

AWS Security Services

IAM · AWS-STS · MFA token · AWS Config · AWS CloudTrail · Amazon CloudWatch · AWS Shield · AWS WAF · Amazon Inspector · Amazon VPC · KMS · S3 · Elastic Load Balancing · IAM · AWS CloudFormation · Amazon CloudWatch · Amazon EBS · Amazon RDS · Amazon CloudFront

Azure Security Services

Azure Active Directory · Azure Policy · Azure Sentinel · Microsoft Defender for Cloud · Azure Network Firewalls · Web Application Firewall (WAF) · DDoS Protection · Application Gateways · Key Vaults · Azure Backup · Azure VWAN Hub · Azure DevOps
